EDUCATION

University of Massachusetts Lowell 05/2027
Bachelor of Science, Computer Science - GPA: 3.95 Lowell, MA

Bunker Hill Community College 12/2023
Associate of Science, Computer Science - GPA: 3.9 Charlestown, MA

Relevant Coursework: Data Structures, Object-Oriented Programming, SQL, Linear Algebra, Calculus 3, Software Development Cycle, Assembly Programming Language, Logic Design, Artificial Intelligence, Machine Learning.

TECHNICAL SKILLS

Languages: Java, C++, C#, Python, Swift, Lua, JavaScript, TypeScript, HTML, CSS, SQL, Assembly (MIPS & X86)

Frameworks & APIs: React, Django, Bootstrap, REST API

Tools & Platforms: Git, POSTMAN, Jenkins, Agile/SCRUM, Docker, Microsoft Azure, SpacetimeDB, Kubernetes

Databases & Environments: PostgreSQL, MySQL, Windows, Unix/Linux, macOS

Other: CI/CD, Version Control, Testing, Software Lifecycle, Design Patterns, Debugging, UI/UX

PROJECTS

PvP Multiplayer Battlefield Web3 Gaming Platform 11/2025

- Engineered a real-time PvP multiplayer experience leveraging SpaceTimeDB for scalable state synchronization.
- Implemented 3D interactive environments using Three.js integrated with React for smooth front-end rendering.
- Developed and deployed Solana smart contracts to handle staking, battle logic, and secure prize distribution.
- Designed matchmaking and gameplay flow to support global concurrent users in a competitive arena.

Full-Stack Real Estate Platform | anthonykadelliu.com 06/2025

- Built a responsive, SEO-optimized real estate platform exceeding industry standards using React and TypeScript.
- Developed Python ETL scripts processing 50,000+ MLS records with data validation and enrichment.
- Automated deployment with GitHub Actions with 3-hour refresh cycles for real time data updates.

Full-Stack Trading Platform 04/2025

- Built a real-time trading platform using Node.js, React, and PostgreSQL, simulating real-value market behavior with paper trading.
- Integrated a Python Django CRM to manage users, trades, and backend operations.

EXPERIENCE

TechServices – University of Massachusetts Lowell 02/2025 – Present
Student Support Analyst Lowell, MA

- Provide front-line IT support as part of UMass Lowell's TechServices department, supporting over 18,000 students and 1,100 faculty/staff, and resolving 30+ account and login issues weekly.
- Collaborate with network, system security, and infrastructure engineers to diagnose complex hardware, software, and network problems.
- Configure Wi-Fi and device connectivity for 100+ users, ensuring secure and reliable access to campus systems.
- Re-image and deploy 50+ desktops across departments, optimizing system performance and user setup efficiency.

TASC – Bunker Hill Community College 02/2023 – 12/2024
Computer Science Tutor Boston, MA

- Enhanced coding efficiency of 60+ students by more than 50% through debugging and problem-solving support.
- Crafted and executed tailored lesson plans for over 50 students, elevating their performance by an average of 25%.
- Mentored students in Java, C++, and Data Structures, leading to 30+ successful project completions.

Mayor's Office of Housing, City of Boston 06/2023 – 08/2023
IT Technical Support Intern Boston, MA

- Improved data accuracy by identifying and deleting 400+ legacy records, ensuring up-to-date information.
- Upgraded infrastructure by upgrading 50+ legacy hardware components, boosting system reliability.
- Delivered end-user support across Windows, macOS, iOS, Android, Microsoft Office, Google Workspace, printers, browsers, and file-share systems; maintained hardware inventory and provisioning records.
